

Advancing our clients' services with secure, scalable, and human-centered tech solutions, delivered by a diverse team of professionals to help clients adapt, reduce risk, lead with confidence, and maximize value.

Core Competencies

AGC Group is a minority-owned, disadvantaged business delivering secure, scalable, and human-centered technology solutions for critical operations. With 30 years of expertise, we combine deep technical knowledge and a hybrid delivery model to accelerate transformation, reduce risk, and deliver measurable results.

Products by AGC Group

IMPLEMENTATION SUITES

ADVISORY SUITE

IdentityCore

***Secure Access.
Smarter Identity.***

IdentityCore streamlines identity and access management with automated provisioning, role-based controls, and AI-driven risk detection. It enables secure, compliant access and operational efficiency, built on Zero Trust principles.

ClarityIQ

***Smarter Decisions.
Trusted Intelligence.***

ClarityIQ unifies data sources and applies AI to deliver predictive insights and automate decisions. It empowers organizations to scale AI responsibly, ensuring compliance and operational agility.

TrustFabric

***Zero Trust.
Real Results.***

TrustFabric guides organizations through Zero Trust transformation with strategic assessments, governance frameworks, and architectural blueprints. It delivers clarity, alignment, and readiness for sustainable security modernization.

Key Differentiators

- ✓ Deep Specialization in ICAM and Zero Trust Architecture
- ✓ Hybrid Delivery Model that Scales with Confidence
- ✓ Inclusive Collaboration as a Strategic Advantage
- ✓ Client-Centric Execution with Measurable Outcomes
- ✓ Cross-Sector Experience in Regulated Environments

Past Performance

U.S. Department of State | 2025

Zero Trust Advancement Project

Advanced secure identity orchestration and lifecycle automation aligned with Zero Trust Architecture (ZTA) standards through policy-based enforcement.

U.S. Department of Defense | 2022

Information Systems Modernization & CMMC Readiness Projects

Modernized IT systems and integrated security controls to enhance operational efficiency and meet Cybersecurity Maturity Model Certification (CMMC) standards.

University of Maryland Medical Systems (UMMS) | 2023

Identity & Access Management (IAM) Project

Implemented a comprehensive IAM program to safeguard critical assets and enforce cybersecurity best practices across hybrid environments.

U.S. Department of Veteran Affairs | 2021

Federal Identity, Credential & Access Management (FICAM) Joint Project

Secured sensitive veteran data through identity governance and multi-factor authentication, enforcing least privilege and policy-driven access.
